## WORDPRESS DEFENSE SERVICE

Stellar Studios is proud to announce that we are now offering WordFence to enhance security for Wordpress installations. This service is available to clients who wish to go above and beyond the traditional Wordpress installation due to previous security breaches or a general concern about security. Wordpress hacks happen often and they can be detrimental to your business and your brand.

### Features:

- Cellphone Sign-in (Two-Factor Authentication)
- Advanced Comment Spam Filter
- Check if Site is Spamvertized
- Check if Site IP is Generating Spam
- Remote Scans
- Country Blocking
- Frequent Scans
- Scheduled Scans
- Premium Support
- Real-time Security Network
- Scan Core, Theme and Plugin Files
- Repair Files
- Scan content for bad URLs
- Real-time traffic shows hackers
- Real-time view of crawlers

- Scan for known malware
- Scan for hundreds of backdoors
- Includes a complete firewall
- Rate limit rogue crawlers
- Block IP's & manage blocks
- Intelligently block networks
- Block fake Googlebots
- Block brute-force attacks
- View top content leeches
- Monitor disk space
- Enforce strong passwords
- Check existing passwords
- Scan for DNS changes
- Get detailed IP info
- Track IP's to their source
- And Other Options

### Why is this not standard practice?

This is not offered as part of the baseline Wordpress hosting for a few reasons:

- >> This service requires VPS hosting, which is an additional charge over our standard shared hosting environments.
- >> Every additional security measure comes with a reduction in liberty, and this is no different. While the Wordpress site remains fully usable, there are some permissions and liberties that are taken away for security measures. These do affect the basic use of Wordpress but rather, avoids inadvertently opening security holes.
- >> This service requires an extended time to set up – usually 3 to 5 business days.
- >> Wordpress Defense also requires extra maintenance time, thus causing a recurring cost.

Many of these security services are provided by WordFence, but the reason for the extra charge is that this is not just a simple installation; we go a step beyond WordPress' automation in order to set up personalized rules, backup schedules, and scheduled audits which do require extra attention. Due to the nature of WordFence, updating WordPress takes extra time as well.

**Only \$99/year**  
plus upgrade to VPS if currently on shared plans

**423.926.4780**
